This questionnaire asks about your experiences in using the wound care software application on the Smartphone or Tablet device over the past few weeks. Your feedback will be used to further improve and fine-tune the software application's design and functionality. Please note the following:

- Your anonymity is protected. The survey does not ask you for any identifying information, and I request that you do not include any identifying information in your free-form comments. As well, Surveymonkey has been set to not capture your computer's IP address.
- Your confidentiality is protected. As the results are presented to the group during the upcoming focus group to which you are invited, the results will be presented in summary form only. Any presentations or publications arising from this work will likewise only present the results in summary form.
- Your feedback is welcome. A summary of the results will be made available to you via email. To further protect anonymity and confidentiality, you do not need to opt in to receive the results. You wll receive them automatically.
- This survey should take you approximately 20 minutes to complete.

Years of bedside nursing experience:

Thank you in advance for your time!

#### 1. The first two questions ask you about your nursing profile.

| 0           | 1-4 yrs   |
|-------------|---|
| 0           | 5-9 yrs   |
| 0           | 10-14 yrs   |
| 0           | 15+ yrs   |
|             |   |
| <b>2.</b> \ | ears of experience in personal care home nursing: |
| 2. Y        |   |
|             |   |
| 0           | 1-4 yrs   |
| 0           | 1-4 yrs<br>5-9 yrs                                |

### 3. Your age:

- O Up to 30 years old
- C 31-40 years old
- C 41-50 years old
- C 51-60 years old
- O over 60 years old

15. The software application comes with two built in alerts / notifications. The first one is a notification when a wound assessment is past due, and the second one is a notification when a wound's latest assessment indicates deterioration relative to the previous assessment. These alerts / notifications are shown when you log in to the application. (Please enter N/A if no alerts / notifications were present over the time that you used the software application).
