### **Message from the Guest Editor**

Edible insects are a promising alternative food source due to their high nutritional value and sustainable production. In some countries, edible insect production must be made increasingly sustainable through the valorisation of waste and by-products for insect feeding as well as the valorisation of farm products. For other countries, it represents a promising prospect for direct or indirect feed and food production.

Deadline for manuscript  
submissions:

**closed (25 May 2024)**

The goal of the current Special Issue is to publish high-quality scientific articles dealing with innovative solutions for edible insect rearing, and new perspectives on the use of rearing products and by-products. We invite you to submit the results of your current scientific research on (i) conditions of edible insect rearing for animal feed production, including those for pet food; (ii) the valorisation of waste from agrifood supply chains for insects sustenance; (iii) the utilization of the products and by-products of rearing, both direct and non-direct; (iv) the production and utilization of flours from them both for Food and Feed; (v) changes in the environmental impact of insect rearing and their connection to the geographical area of their setting.

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
