Department of Veterinary Clinical Sciences, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, Kowloon, Hong Kong 518057, China

Dr. Pablo Pinedo

Department of Animal Sciences, College of Agricultural Sciences, Colorado State University, Fort Collins, CO 80523, USA

Deadline for manuscript submissions:

closed (31 May 2024)

Message from the Guest Editors

The transition period in dairy cows is one of the key stages of the entire productive cycle of the dairy cow. Management of the transition cow should focus on minimizing the adverse impacts of negative energy and protein balance, the severity of hypocalcemia, other macro- and microminerals, a reduction in ketosis, the excessive release of non-esterified fatty acids (NEFA), hepatic lipidosis, displacement of the abomasum, inflammatory disorders (metritis and mastitis), and oxidative stress. In addition, the adaptation of the rumen to diets richer in starch, and therefore, a reduction in the risk of rumen acidosis, must be addressed. In the end, any of these management strategies will help in modulating the immune system, reducing the negative impact of the typical immunosuppression that occurs around parturition.

We invite original research and review papers that contribute new information on immunomodulation and metabolism during the transition period of dairy cows. Research and review papers may cover basic research topics, but manuscripts focused on practical management, including case reports, epidemiological studies, and field trials, are also encouraged and welcomed.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
