

Design and Sensitivity Analysis for Biosensors: Latest Advances and Prospects

Guest Editors:

Dr. Naveen Kumar

Device Modelling Group, School
of Engineering, University of
Glasgow, Glasgow G12 8LT, UK

Dr. César Pascual García

Materials Research and
Technology Department,
Luxembourg Institute of Science
and Technology, Esch-sur-
Alzette, Luxembourg

Deadline for manuscript
submissions:

30 July 2024

Message from the Guest Editors

Dear Colleagues,

Biosensors are becoming a more prominent part of our lives. The requirements of high sensitivity, better reliability, accuracy, and repeatability of biosensors are a few major deal breakers for a biosensor to be commercialized. Most biosensors, either selective or label free, are based on the interaction of the receptor and target molecules but it is always hard to predict the behavior of the sensor system. Even with the advancements, recent research still focuses on the design and optimization of novel biosensor structures. Therefore, this Special Issue focuses on the latest advancements and prospects of novel biosensor designs. We encourage authors to submit manuscripts on FET-based biosensors and biosensing signal amplification circuits are encouraged. Experimental or simulation studies of biosensors to explain the quantitative results are also welcome.

For more information on the Special Issue, please visit LINK

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
