Message from the Guest Editor

Dear Colleagues,

Childhood obesity has reached epidemic proportions in the developed world and is on the rise in the developing world as well. The nutrition and physical activity transition, in parallel with the current obesogenic environment, has created a challenging milieu in which to combat obesity. There is evidence to suggest that early intervention is the wisest strategy and that there are critical periods during growth and development when preventive efforts or treatment intervention are thought to be most effective. The focus of this special issue will be on critical periods of weight management during which the development of healthy lifestyle behaviours is paramount. We will accept original research papers and short review papers deemed relevant.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
