Message from the Guest Editor

Dear Colleagues,

A current way to decrease the cost and expedite the development of novel drugs is to use the strategy of drug repositioning (drug repurposing). This strategy involves the use of drugs that are clinically approved for one condition to treat a different condition. Drug repositioning can expedite drug development by making use of drugs whose toxicity and pharmacokinetic profiles have already been extensively characterized. Drug repositioning has been successfully used for the treatment of conditions such as cancer, obesity, and osteoporosis, as well as others. Much promise exists for the successful repositioning of other drugs.

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Pharmaceutical Science*)
