

Study on Solid Waste Characterization and Control, and Pollutant Transport Dynamics

Guest Editors:

Prof. Dr. Jesus Díaz-Curiel

Prof. Dr. Jose Antonio Grande

Dr. Lucía Arévalo-Lomas

Dr. Bárbara Biosca

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

The current problems due to environmental phenomena associated with the generation of solid waste, which encompass a myriad of origins such as agriculture, industry, domestic, construction, electronic waste, and many more, require multidisciplinary solutions. Understanding and knowledge of the transport mechanisms between different environmental factors are key aspects in order to minimize their scope and remediate their effects, through proper characterization and control. The presence of water is an important factor in the physical, chemical, and biological phenomena that trigger contaminating processes in the subsoil, and in the transport of these pollutants, whether through groundwater, runoff water, or river channels, often ending up in the seas and oceans. This diversity implies added difficulty in the study of pollutant mobility, compounded by the heterogeneous nature of the pollutants themselves.

This Special Issue is dedicated to the publication of the latest advances in characterization and control methods, as well as in mathematical tools for modeling and analyzing the transport processes of solid waste in different media.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
