## Aims

*Ruminants* (ISSN 2673-933X) is an international open access journal. It publishes original research articles, reviews, and communications that offer substantial new insight into any field of study that involves ruminants, including cattle, all domesticated and wild bovines, goats, sheep, giraffes, deer, gazelles, and antelopes. Scientifically excellent papers that consider ruminants in the context of genetic or environmental conservation, rural development, or that have significant implications for animal welfare will be particularly welcome, and an interdisciplinary approach is encouraged. Experimental and genomic studies must explain what hypotheses are being tested, and whether new hypotheses are required. Submissions with a strong veterinary, nutritional, meat or dairy science, or genetic focus must make the wider interest of the work very clear. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental details and/or method of study, must be provided for research articles.

---

## Scope

- Domestic and Wild Ruminants
- Animal Husbandry and Organic Farming
- Animal Health and Welfare
- Emergent and Established Ruminant Diseases
- Milk and Dairy Products
- Genetics and Genomics
- Grazing Systems

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

### Rapid Publication

A first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 4.3 days (median values for papers published in this journal in the second half of 2023)
