Tropical Medicine and Infectious Disease

A large, red-tinted photograph of tropical foliage, possibly a palm frond, occupies the lower-left portion of the cover. The leaves are long and narrow, creating a dense, textured pattern.

Message from the Editor-in-Chief

As the only MDPI open access journal dedicated to tropical medicine and infectious disease, and building on 16 years of publication of its predecessor, *Annals of the Australasian College of Tropical Medicine* (ACTM), the papers published in *Tropical Medicine and Infectious Disease* span from those sciences related to tropical medicine and infectious disease, to clinical tropical medicine, as well as epidemiological and social science studies and the fields related to disease control and global public health. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging tropical medicine and infectious diseases, as well as timely reviews and topical commentary on cutting-edge aspects of all these areas. Papers in allied fields, such as travel medicine and expedition and wilderness medicine, are also welcome.

Editor-in-Chief

Prof. Dr. John Frean

Deputy Editor-in-Chief

Prof. Dr. Peter A. Leggat *

Aims

Tropical Medicine and Infectious Disease (ISSN 2414-6366) publishes authoritative and original articles, critical and systematic reviews, editorials, perspectives, short communications, commentaries, book reviews, letters to the editor and Special Issues on all aspects of tropical medicine and infectious disease. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced. There is, in addition, a unique feature of this journal:

We accept studies showing meaningful but negative results. While there are many journals that focus on tropical medicine and infectious disease studies, none of them actively accept negative results. As a result, most negative data do not end up in the public domain, even if the data were meaningfully negative and the study was well-designed. By accepting such negative results, our journal encourages scientists to share these data, so that they will not need to repeat experiments that somebody else has already done.

Scope

The scope of *Tropical Medicine and Infectious Disease* includes, but is not limited to:

- Clinical tropical medicine
- Tropical public health
- Tropical infectious diseases
- Parasitology and entomology
- Bacteriology, mycology and virology
- Epidemiological and social science studies
- Chemotherapy and pharmacology
- Immunology
- Disease prevention, control and elimination
- Emerging and re-emerging infectious diseases
- Emerging public health threats
- Global health and One Health

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

2022 Impact Factor: 2.9

(*Journal Citation Reports* - Clarivate, 2023)

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases

Rapid Publication

A first decision is provided to authors approximately 19.4 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2023)
