## Water, Wastewater and Waste Management for Sustainable Development

Guest Editor:

**Prof. Dr. Wojciech Czekala**

Department of Biosystems  
Engineering, Poznań University  
of Life Sciences, Wojska  
Polskiego 50, 60-627 Poznań,  
Poland

Deadline for manuscript  
submissions:

**closed (10 February 2024)**

### Message from the Guest Editor

Sustainable development is one of the most important challenges of the 21st century. On the other hand, society's impact on the environment is becoming increasingly evident. It concerns almost every country in the world. Despite the development of newer technologies, many people still do not have access to the appropriate quality resources, including but not limited to food and water. Therefore in the light of circular economy becoming a globally acknowledged philosophy, water, food, and other resources should be protected both qualitatively and quantitatively.

This Special Issue titled “Water, Wastewater and Waste Management for Sustainable Development” will cover topics related to sustainable water, sewage, and waste management, including resource reduction, treatment, and environmental impact.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
